JAE YEON KIM

Overview

- Computational social scientist: using data science to study the politics of diversity and inclusion
- Research software developer: building tools that make digital data collection easier and faster
- Experience: analyzing survey, experimental, administrative, and text data using statistical and machine learning methods

EDUCATION

2016 | Present University of California, Berkeley

PhD Candidate in Political Science

◆ Berkeley, California, USA

Summer 2019 **Summer Institute in Computational Social Science**

Participant (10% acceptance rate)

Princeton University, Princeton, USA

2014

2012

University of California, Berkeley

MA in Political Science

♥ Berkeley, California, USA

Korea University

BA in Political Science and English (comleted exchange student programs in Hong Kong and Taiwan)

Seoul, South Korea

PROFESSIONAL EXPERIENCE

May 2019 | Present Senior Data Science Fellow, Instructor, and Statistical Consultant

Data-intensive Social Sciences Lab

♀ UC Berkeley

- Developed an internal Shiny-based dashboard for inspecting humanlabeled and machine predicted outcomes of the D-Lab's Online Hate Speech Index Project
- Consulted 70+ Berkeley faculty, students, and staff on applied statistics, machine learning, and database management
- Developed seven original data science workshops (Machine Learning with Tidymodels, Fairness and Bias in Machine Learning, SQL for R Users, R Package Development, Functional Programming in R, Advanced Data Wrangling in R, and Reproducible Project Management in R)
- Taught programming fundamentals, data wrangling, machine learning, and project management
- Structured and streamlined consulting and workshop production

Last updated on 2020-11-05.

COURSEWORK

Statistical and Causal Inference, Experimental Design, Survey Methods, Game Theory, Computational Social Science

Passed Political Behavior (social and cognitive psychology, survey and experimental design) field exam with distinction

SKILLS

Quantitative: Statistical and causal inference, Experimental and survey design

☐ Computational: Natural language processing, Machine learning, R (tidyverse, tidymodels, statistical packages), Python (pandas, scikit-learn), Git, SQL (PostgreSQL), NoSQL (MongoDB), Linux Command Line

September 2020 | Present

Visiting Student Fellow

P3 Lab, SNF Agora Institute

- **Q** Johns Hopkins University,
- Collaborated with Milan de Vries (former Director of Analytics at MoveOn.Org)
- Parsed more than 3 million tax reports (XML files stored in Amazon AWS) filed by nonprofits in the United States and linked this data source with these organizations' websites and social media handles
- Designed and built a data infrastructure that tracks civic organizations in the US and their relationships with food security, polarization, and the 2020 racial justice movement

Spring 2020

Data Science Education Program Fellow

Data Science Education Program

Q UC Berkeley

- Served as research lead for the undergraduate students and project partners involved in 40+ data science discovery projects
- Taught original workshops on project management, computational reproducibility, bias in machine learning, and data visualization
- Published an article on project management in SAGE Ocean, an initiative from SAGE Publishing focusing on computational social science

Fall 2016 | Present

Graduate Student Instructor

Department of Political Science

Q UC Berkeley

- Developed and taught an original graduate-level course on computational tools for social science research as an instructor (original online textbook)
- Taught an undergraduate-level applied statistics as a teaching assistant and received the outstanding graduate student instructor award, which is given to less than 10% of Berkeley TAs

tidytweetjson: R package for turning Tweet JSON files into a cleaned and wrangled dataset. The package takes 12.34 seconds to turn 5,685 articles into a tidy dataframe.

tidyethnicnews: R package for turning search results from one of the largest databases on ethnic newspapers and magazines published in the United States into a cleaned and wrangled dataset. The package takes 4 minutes to turn 2 million tweets into a tidy dataframe.

makereproducible: R package for making a project computationally reproducible before sharing it.

TidyChaseBankStatements: R Package for turning Chase bank Statements into a tidy dataframe.

Fellowships: Democracy Visiting Fellowship, Ash Center for Democratic Governance and Innovation, Kennedy School, Harvard University (2020, declined), D-Lab Data Science Fellowship, UC Berkeeley (2020), Data Science Education Program Fellowship, UC Berkeley (2020), American Democracy Project Fellowship, UC Berkeley (2019), California Poverty and Socioeconomic Inequality Fellows Program, the Blum Initiative for Global and Regional Poverty Studies (2017), Berkeley Empirical Legal Studies Graduate Fellowship, Center for the Study of Law and Society, UC Berkeley (2017)

★ Awards: Don T. Nakanishi Award for Distinguished Scholarship and Service in Asian Pacific American Politics, Western Political Science Association (2020), Outstanding Graduate Student Instructor Award, UC Berkeley (2016)

A RESEARCH EXPERIENCE

Summer 2020 | Present

Large-scale Twitter Analysis on COVID-19 and Anti-Asian Climate [GitHub] [Preprint]

PhD Candidate

Q UC Berkeley

- Developed an R package that automates parsing a large Tweet JSON file (>5GB) into a cleaned and wrangled dataset
- Applied dynamic topic modeling to 1.4 million tweets and traced the rise of anti-Asian sentiment in the post-pandemic US
- Presented at the 2020 American Political Science Association annual meeting
- · Co-authored a preprint

Fall 2019 | Present

Causal Inference and Machine Learning [GitHub] [Preprint] [Slides]

PhD Candidate

Q UC Berkeley

- Developed an R package that automates parsing ethnic newspaper articles (in HTML format) into a cleaned and wrangled dataset
- Used a natural experiment and machine learning to examine how threats prompt information seeking among marginalized populations
- Presented at the joint Political Computational Social Science and Political Network 2020 Conference and the Berkeley Computational Social Science Forum
- · Co-authored a preprint

Spring 2020

Intersectional Bias in Hate Speech and Abusive Language Detection Datasets [GitHub] [Preprint] [Slides]

PhD Candidate

Q UC Berkeley

- $\boldsymbol{\cdot}$ Classified gender, racial, and party identities of the 100k tweets
- Demonstrated African American tweets were up to 3.7 times more likely to be labeled as abusive, and African American male tweets were up to 77% more likely to be labeled as hateful compared to the others
- Published the paper version in Proceedings of the Fourteenth International Conference on Web and Social Media (ICWSM), Data Challenge Workshop

Fall 2018 | Spring 2019

Natural Language Processing and Machine Learning [GitHub] [Preprint] [Slides]

PhD Candidate

Q UC Berkeley

- Demonstrated unreliable training data generates weak predictions and extreme interpretations using 80k+ ethnic newspaper articles
- Received the Best Paper Award in Asian Pacific American Politics from the Western Political Science Association (2020)
- Authored a preprint, which was conditionally accepted at the Journal of Computational Social Science

2016 | 2018

Statistical Modeling of Time Series Data [GitHub] [Preprint]

PhD Candidate

Q UC Berkeley

- Examined how social policy influenced community organizing among Asian Americans and Latinos by creating an original organizational dataset and modeling time-series data
- Authored a preprint, which was invited to Revise and Resubmit at Political Research Quarterly

2019 | Spring 2020

Survey and Experimental Research [GitHub] [Preprint]

PhD Candidate

Q UC Berkeley

• Designed a within-subject experiment and embedded it in a Californiawide survey to investigate how different racial groups interpret questions on racial solidarity differently

Authored a preprint

Summer 2018

Survey Research [GitHub]

Graduate Student Researcher

Q UC Berkeley

• Cleaned and wrangled the largest panel survey data on Asian Americans and conducted factor and regression analysis

SOURCE ORGANIZING EXPERIENCE

Summer Institute in Computational Social Science in the San Francisco Bay Area

Co-organizer

• August 2019 - July 2020

- Raised 50k+, reviewed 100+ applicants and selected 20 participants
- Developed close partnerships with Bay Area nonprofits (e.g., Code for America, DonorsChoose, Hopelab)
- Designed the curriculum, guided the project development and developed the evaluation criteria
- Published a blog post on the *Berkeley Institute of Data Science* website that highlights the key accomplishments of the Summer Institute
